AB Dental Devices' products are cleared for marketing by the FDA and are CE-marked in accordance with the Council Directive 93/42/EEC and Amendment 2007/47/EC. The products availability may vary between countries according to each local regulatory approval.

AB Dental Devices complies with EN ISO 13485:2016 and Australia - Therapeutic Goods (MD) Regulations, the Canadian Medical Devices Regulations - SOR 98/282, USA - 21 CFR 806, 21 CFR 807 (A-D).

AB Dental is an international, dynamic and innovative company, specializing in the development, manufacturing and marketing of dental implants, prosthetic products and surgical tools. We provide the dentist a complete solution to satisfy all clinical needs, along with computerized implant planning and surgical guides with custom individual implants. Our vision is providing a wide selection of outstanding products, meeting the highest standards, with excellent professional service.

AB DENTAL OFFERS A UNIQUE MODEL TO THE MARKET WHICH PROVIDES THE DENTIST WITH A COMPLETE END TO END SOLUTION

- Computerized implant planning
- 3D printing of surgical guides
- Custom individual implants using laser-sintering technology
- A wide range of implants, prosthetic parts, tools, accessories, CAD/CAM solutions and regenerative materials required for the dentist to perform an accurate and successful treatment
- ◆ In-house training center fully equipped for lectures and hands-on training.

AB Dental adheres to the highest quality international standards and is MDSAP & ISO 13485 certified. AB Dental has obtained approvals from regulatory agencies in multiple countries: MDSAP, FDA (USA), CE (Europe), Russia Federation, AMAR (Israel), NMPA (Chinese FDA), India FDA, TFDA (Taiwan FDA), TGA (Australian MOH), Health Canada and more.

WITH A MISSION TO LEAD THE MARKET WITH THE NEXT GENERATION OF SMART DENTAL TECHNOLOGY AND SOLUTIONS, WE PROVIDE MORE THAN JUST SERVICES - WE HOLD OURSELVES TO HIGHER STANDARDS OF CARE

Continuous Innovation: Never content to simply create when we can lead the way, we constantly improve and expand our innovative line of products, offering breakthrough technology that goes beyond addressing today's market needs to provide visionary and enhanced solutions.

Patents, products, and tailor-made solutions: Unique patented smart solutions give you an edge in the market. Our large portfolio of products allows for diversified solutions.

The combination of creativity, unparalleled R&D, and our unique marketing model enables us to provide a swift response to adapt to changing needs in the relevant markets.

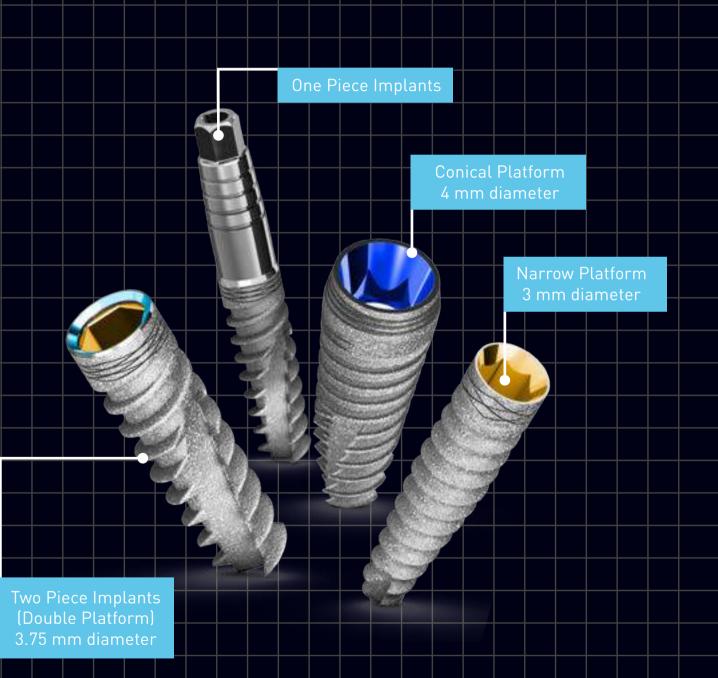

Advisory Board: AB Dental's advisory board covers all aspects of dentistry and includes renowned researchers from leading universities, equipping AB Dental to foresee and address all dental needs and perspectives.

Advanced Training Center: We provide on-going training for all our dentists and dental technicians to ensure excellence and continued development.

Human resource: We know that the right staff is the foundation of any successful company. Investment in client interaction and satisfaction is as pivotal as technology.

OUR DENTAL IMPLANTS ADVANTAGES

A WIDE RANGE OF DENTAL IMPLANTS FOR ALL PLATFORMS AND SIZES (SHORT/LONG/WIDE), EACH ONE HAS A UNIQUE DESIGN TO MEET THE REQUIREMENTS OF EACH DENTIST AND PATIENT.

PLATFORM SWITCHING:

Restoration of implants with diameter-reduced abutments, for improved preservation of crestal bone levels and increasing the soft tissue volume contributes to long-term esthetic outcomes.

DOUBLE PLATFORM: The implants are designed

to accommodate two restorative platforms: Deep connection (Internal Hexagon 1.8 mm), suitable for all abutments with antirotational hexagon. Flat connection (0.2 mm), designed for non-engaging abutments (Non hexagon)

BIOLOGICAL SURFACE:

The implant undergoes special blasting with calcium phosphate for surface roughening and enhanced osseointegration.

NECK RINGS:

For improving bone to implant connection at the crestal zone.

TWO THREADS:

Flat thread that enables the strongest initial stability. Sharp thread that enables the insertion of the implant easily and with minimal trauma to the bone.

IMPLANTOLOGY

MATERIAL

All AB Dental implants are made of Titanium alloy Ti-6Al-4V ELI in accordance with ASTM-F136-02 standard specification.

Titanium is a proven ideal implant material, mainly due to its ability to integrate almost completely with the bone. In addition to being "bio-friendly", it provides favorable mechanical qualities (strength, endurance) and can be precisely fabricated (precision measured in microns) to ensure a range of implants that meet the requirements for optimizing stability in the widest range of patients (considering the dimensions and state of health of an individuals' bone and gums).

BIOLOGICAL SURFACE

AB Dental implants undergo a special treatment of Biological blasting with calcium phosphate for surface roughening, to enhance the direct attachment of the bone to the implant (Osseointegration), as supported by the following quote from an article that compared different surface treatments:

"As the implant surface is the first part of the device to contact the host's biological fluids, it is expected that its properties will affect the early healing between host and implant" (Albrektsson & Wennenberg, 2004).

"Over the years, implant surfaces have evolved from smooth as-turned surfaces towards textured surfaces. Surface texturization may be achieved through a series of methods such as acid-etching, grit-blasting, anodizing, and others" (Albrektsson & Wennenberg; Coelho et al., 2009). "However, concerns regarding the final surface biocompatibility have been expressed" (Lemons, 2004).

"The new biological surface, offered by AB Dental, combines all the technological innovations within one surface resulting in biological advantages.

The wide particle range bioactive ceramic media blasting with mild gradative multi-step cleaning assures a moderately rough surface (Figures 1 and 2) along with a highly biocompatible surface chemistry where only Osseo conductive and biocompatible elements can be detected" (Figure 3).

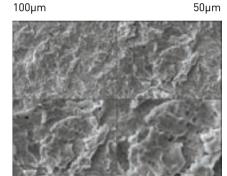

(Albrektsson & Wennenberg, 2004).

Figure 1:

Scanning electron micrographs of the biological surface. The bioactive ceramic media blasting with mild gradative multi-step cleaning assures a moderately rough surface. The surface treatment results in surface texturization in the micrometer and nanometer level, maximizing the interaction between surface and biological fluids immediately after implantation, and load bearing capability after Osseo integration establishment.

30um 20um

Figure 2:

Representative three-dimensional topographical reconstruction showing texturization at the micrometer and the nanometer level.

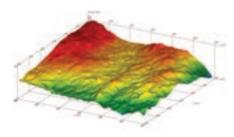

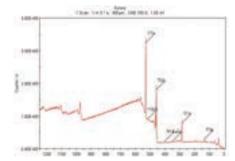

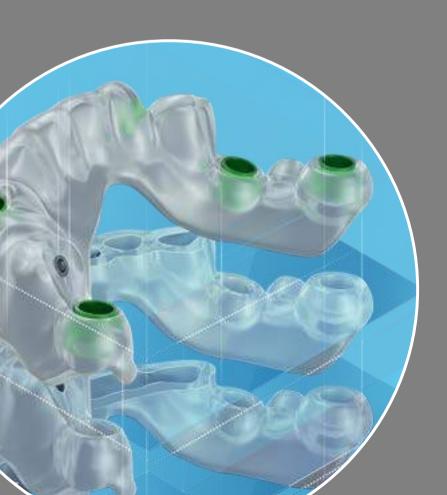

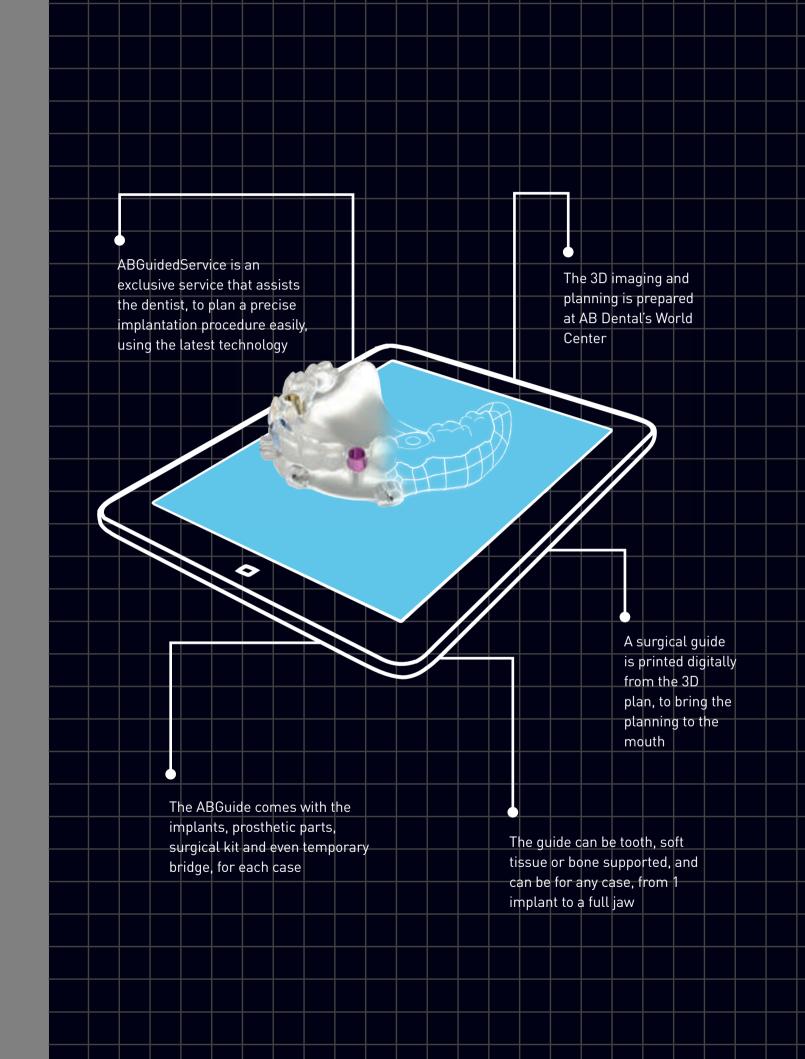

Figure 3:

Surface specific spectroscopy detecting only the elements of the implant with no contamination.

NBGUIDEDSERVICE

ABGUIDEDSERVICE

GENERAL INFORMATION

ABGUIDEDSERVICE will prepare a treatment plan according to your instructions, and present to you 2D and 3D images in ABDenpax web-based technology.

You can view the plan, consult with colleagues or dental laboratory (as the location of the restorations can be seen in the virtual plan) and either request changes or approve the plan.

 After the treatment plan is approved, a surgical guide is manufactured digitally, directly from the planning software.

ABGUIDEDSERVICE is designed for users of A.B. Implants. The process is so easy, that you can use surgical guides for even 1 implant.

There is no need to install software and to learn how to use it.

ABGuided and ABDenpax provide this service for you, with all the images you need to view your plan.

The case can also be sent with interactive software for dentists who wish to plan or make changes by themselves.

The ABGuided Drill Kit provides all the tools you need to use with a surgical guide. The color-coded drills have stoppers which correspond to the planned drill depths, and no measurements and calculations are needed at the time of surgery.

The surgery takes less time, and both you and your patient are more relaxed.

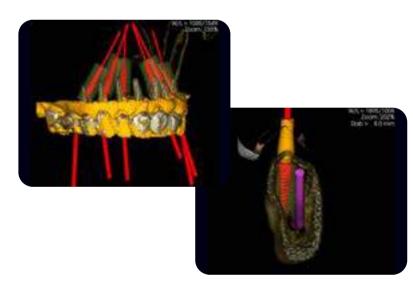

This technology will allow you to use your knowledge of implantology in a more efficient and safer way.

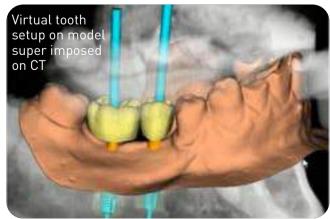

9 REASONS WHY

- Maximum accuracy
- Relating to prosthetics
- All calculations and measurements before surgery
- Flapless in many cases
- Minimally invasive
- Can save bone augmentation and sinus lift
- Angled implants
- Surgery takes less time
- Abutments and healing caps planned

ABGUIDEDSERVICE

15

ALL CASES

- Single Tooth
- Multiple Implants
- Angled Implants
- Edentulous
- Pterygoid
- Zygoma
- All cases with or without Flap

ABGUIDES CAN BE:

- Tooth supported
- Tooth and Soft tissue supported [free end]
- Soft tissue supported [edentulous]
- Bone supported
- Tooth and Bone supported

STEP BY STEP

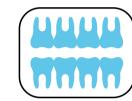

1

The doctor orders an ABGuide using free and easy to use ABDenpax software

2

CT scan and 3D planning by ABGuided Service. Most cases without CT Guide. ABGuide is produced digitally from the approved plan.

3

Implant surgery with ABGuide, A.B. implants and prosthetic parts and ABGuided drill kit. The implants and parts are provided for each case.

OPTION: MODELS WITH ANALOGS & TEMPORARY RESTORATIONS

Models of the jaw, or copies of the impression model, can be 3D printed directly from the planning software, with analog positions exactly in the planned implant positions. This enables a temporary bridge to be made before the surgery, for immediate loading.

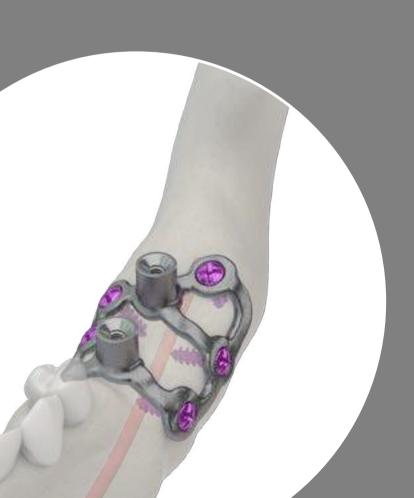

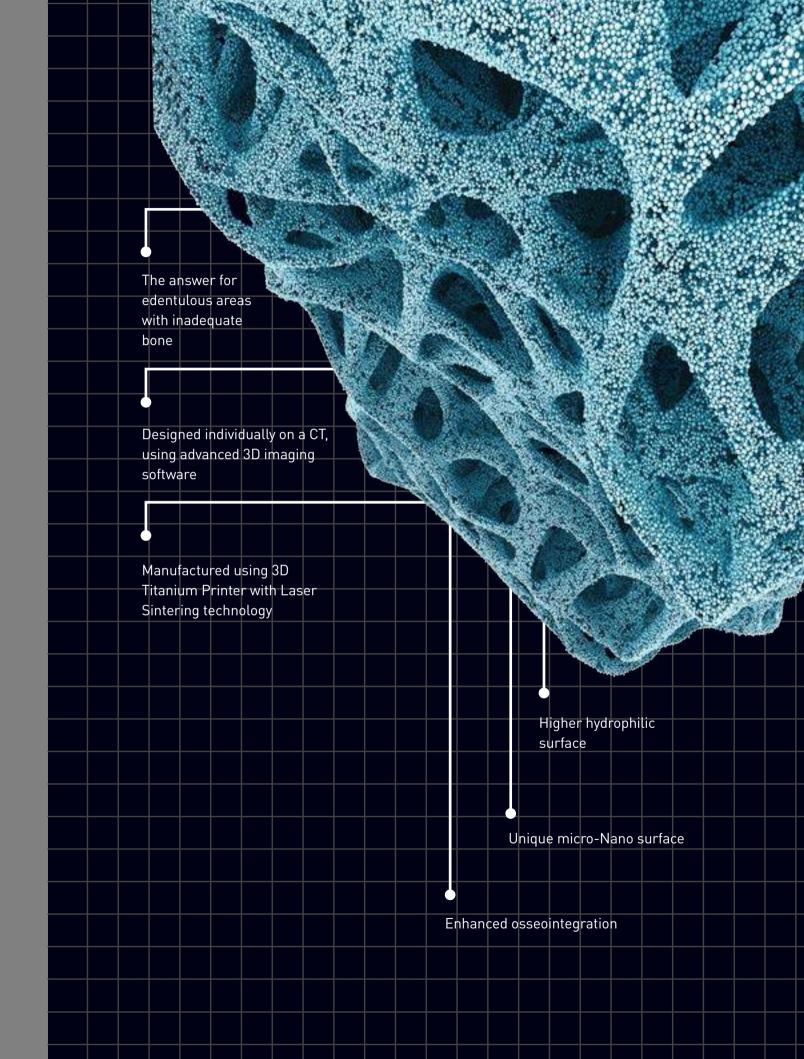

CUSTOM INDIVIDUAL IMPLANTS

CUSTOM INDIVIDUAL IMPLANTS

3D LASER PRINTED CUSTOMIZED IMPLANT

A unique solution that uses 3D laser printed technology combined with ABGUIDEDSERVICE, computerized planning system, to design an implant for an individual case.

GENERAL INFORMATION

There are situations where conventional implants cannot provide a solution.

AB Dental's Customized Implants are the answer for edentulous areas with inadequate bone.

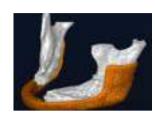

Each implant is designed individually on a CT, using advanced 3D imaging software, and manufactured using 3D Titanium Printer with Laser Sintering technology.

The implant surface is similar to a standard implant, to achieve osteo-integration with the bone surface. The abutment positions are planned relating to the future prosthetic restoration.

Individually designed Custom Implants are also used in Maxillo-facial surgeries to restore partial or full jaws in cases of traumatic injuries, or removal of tumor or lesions.

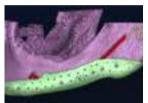

These advanced surgeries are more predictable and take less time.

PK PROSTHETIC KIT

Perfect solution for impression and transfer techniques, both for a single crown and bridge restoration

Enables to take closed-tray impression with the benefits of an open-tray

> Makes the restoration process as simple as possible; eliminating any necessary adjustments and providing a complete set of tools. No need for additional parts

Available in 4 different heights (1-4) in both platforms: standard - 3.75mm

The kit is available in a pack of ten.

OVERDENTURE RESTORATION

ISSUED PATENT P5-20 ANGULAR BALL ATTACHMENT 20°

Multi-optional angular ball attachment, made from a single piece, designed to connect a denture on tilted implants

Enables adjustment of the angle at which the implant is positioned

Provides multiple solutions for difficulties in affixing and removing overdentures, side pressures from other teeth/ implants and prevents wear of ball attachment

Excellent solution for nonparallel implants, even at extreme angles, for accurate joints on overdenture implants

> **Issued Patent** by AB Dental

Platform switching by design, allowing perfect environment for softtissue growth and helps to prevent bone resorption

BONE GRAFTS & ACCESSORIES

BOVINE BONE

NBBIO MATERIAL BIOFILL-H *

Bone Grafts and Tissues from Human Source

MINERALIZED CORTICAL GRANULES

Provides a comprehensive solution for temporary and permanent restoration while retaining maximum precision.

Cat. No.	Description	Size
AB1001	0.212-0.85 mm	1cc
AB6001	0.5-1.0 mm	1cc
AB6005	0.5-1.0 mm	5cc

DBM-DEMINERALIZED BONE MATRIX

READY TO USE NO REHYDRATION OR MIXING

Bone Graft - putty texture. Consists of 93% demineralized bone and 7% Hyaluronic acid. Comes in a variety of volumes.

Cat. No.	Description	Size
AB3010	DBM PUTTY 0.212-0.85 mm	1cc
AB3025	DBM PUTTY 0.212-0.85 mm	2.5cc

MBBIO MATERIAL BIOFILL-B

BIOFILL-B is a natural bovine cancellous bone substitute. New Gold Standard in Xenograft, CE1023, ISO 13485, FDA certificates.

INDICATIONS

- 1. Bone regeneration and augmentation
- 2. Alveolar ridge defect
- 3. Extraction defect
- 4. Sinus augmentation
- 5. Periodontal defect

BIOFILL-B is made from 100% cancellous bone without any cortical portion. Innovative pulverizing technique allows multiparous structure, maximizing blood vessel ingrowth.

Average BIOFILL-B pore size is more than three times of other world leading product. Osteoconductive surface.

Octacalcium phosphate crystal resulting fast bone formation.

Store at the temperature range 4-30°c.

MANUFACTURING

- 1. Safety of raw material.
- 2. BIOFILL-B passed Virus inactivation test, Toxicity test, Biocompatibility test and Gamma sterilization.
- 3. Manufacturing Technique of Multiporosity.
- 4. Size of the cancellous bone: 0.5-1.2mm 1.2-1.7mm

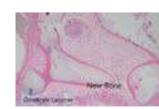

Cat. No.	Description
BioFill-B-0.5g-l	BioFill-B-0.5g, 1-2 mm Granules
BioFill-B-0.5g-s	BioFill-B-0.5g, 0.5-1 mm Granule

^{*} These products do not bear a CE symbol because they are medicinal products under the scope of medicinal product act

ABBIO MATERIAL BIOFILL-S

BIOFILL-S is a porous synthetic ceramic, containing 99.9% beta tricalcium phosphate $(\beta$ -TCP), designed for the filling of bone voids or defects, and is available in several geometries (granules, blocks, cylinders and wedges).

BIOFILL-S macroporosity and porous interconnectivity allows an excellent osseointegration, as well as a total vascularization of the implant with an excellent mechanical resistance.

BIOFILL-S is highly bioactive, stimulating the proliferation and differentiation of osteoblasts, allowing a total replacement by new vital bone during the healing process, within 1-6 months.

Its osteoconductive structure combined with its high hydrophilic promotes the suffusion of biological fluids.

BIOFILL-S is Radiopaque, allowing the perfect monitorization of osseointegration. Due to his high hydrophilic profile the particles present high cohesivity, conserving the volume of the initial cavity.

INDICATIONS

BIOFILL-S is intended to be used as a bone void filler or augmentation material for bone defects that are not intrinsic to the stability of the bony structure:

- 1. Sinus floor elevation
- 2. Alveolar filling or augmentation
- 3. Alveolar regeneration
- 4. Filling of extraction cavities
- 5. Reconstruction of tumor void and cysts defects

Excellent mechanical resistant | Excellent malleability | Excellent bioactivity

Cat. No.	Description
BioFill-S-0.5g-s	BioFill-S-0.5g, 0.5-1 mm Granules (5 Unit pack)
BioFill-S-1g-s	BioFill-S-1g, 0.5-1 mm Granules (5 Unit pack)

BIOSEAL-C ABSORBABLE COLLAGEN MEMBRANE

BioSeal-C Absorbable Collagen Membrane, for successful Guided Bone Regeneration (GBR) and Guided Tissue Regeneration (GTR).

ADVANTAGES

- + Excellent tensile strength
- Excellent tear resistance
- Fast hydration
- Adapts to various defects easy to shape and adapt to the osseous defects
- Prolonged barrier function biodegradable period, more than 3 months
- Assists fast blood supply to the defect through high porosity and special surface area, for optimal regeneration of bone and soft tissue
- Lower incidence of soft tissue dehiscence due to natural collagen structure
- High suture pullout strength

CLINICAL INDICATIONS

GTR procedures

GBR procedures such as:

- Extraction socket grafting
- Site preparation for implant
- + Preservation of the alveolar ridge
- Fenestration defect
- Sinus floor augmentation over the lateral window and Schneiderian membrane repairs

Cat. No.	Size
CM-1.5x2	15mm X 20mm

ACCESSORIES

TLJ TRANSPARENT LOWER JAWS

Transparent plastic model of the lower jaw, illustrating implants and rehabilitation components.

ABPhysio/ABPhysio-light MOTOR

SYSTEM FOR IMPLANTOLOGY

New AB Dental MD 11 Motor System for Implantology with sophisticated motor control, for smooth and precise power delivery - any speed range.

- ◆ Motor speed range of 300 40,000 rpm.
- → 70 Ncm of maximum torque at 20:1 Contra Angle with graphical, real time torque control on display (with or without LED optional) with internal/external cooling system.
- + Sturdy, high quality finish.
- + Integrated pump system for cooling to prevent tissue damage.

New AB Dental MD 11 Motor System for Implantology with sophisticated motor control, for smooth and precise power delivery - any speed range.

- Motor speed range of 300 40,000 rpm.
- ◆ 70 Ncm of maximum torque at 20:1 Contra Angle with graphical, real time torque control on display (with or without LED optional) with internal/external cooling system.
- + Sturdy, high quality finish.
- Integrated pump system for cooling to prevent tissue damage.

The new AB Dental MD 11 Motor System, is developed with the intention to put extra smoothness into your hands. electronic motor and sophisticated motor control are key players in this product.

This reflects new design with smooth edges for easy cleaning and a display that gives you all the information at a glance. Single function keys with haptic and audible feedback guarantee for accurate device setup.

Inserting and changing tube sets is carried out effortless by a front access push button and tube compartment. The tube bracket swings out and stays in plain sight while the tube set is positioned between the two notches of the bracket.

A broad variety of extensions and accessories is provided and can be added.

Included in delivery:

- + AB Dental MD 11 Control Unit
- Electronic Vario Pedal
- Electronic Motor
- Sterile Tube Set, 2 m
- Clip set for tube set mount
- Stand for irrigation fluid
- + Handpiece cradle
- User Manual MD 11 in
- 5 languages on CD

2028 AB MD 11, brushless single motor system, 40,000 rpm consists of:

- → 1 x Control unit MD 11 (3335) with 1 micromotor socket, irrigation pump on the top surface of the housing, socket for Vario-pedal
- + 1 x Contra-angle 20:1 (with or without LED optional) with internal/external cooling system (5052)
- ◆ 1 x Electronic motor 21, 40,000 rpm, with cable 2 m, autoclavable, metal plug (2097)
- + 1 x Vario-foot control IP 68 (1866), electronic, suitable for operating theatre
- + 1 x Single tubing set (1706), disposable, sterile, 2 m
- + 1 x Bottle holder (1770)
- + 2 x Spray nozzle attachment for NOU-CLEAN (1942 / 1958)
- + 1 x Cooling fluid flask NaCl 0.9 %, 1lt (1696)
